

PROGETTO:
Arch. Immaculada JANSANA FERRER - CAPOGRUPPO
Arch. Nicola DESIMINI
Ing. Francesca GRECO
Ing. Marco GIUSTO

CONSULENTI:
Dot. Geol. Gianvito TEOFILO - aspetti geologici
Dot. Forest. Antonio BERNARDONI - aspetti botanico | vegetazionali

sistema 1 "duna"
 Comunidad Echinophoro Spinosae-Ammophiletum

Ammophila littoralis

Pancratium maritimum

Medicago marina

Eryngium maritimum

Vulpia membranacea

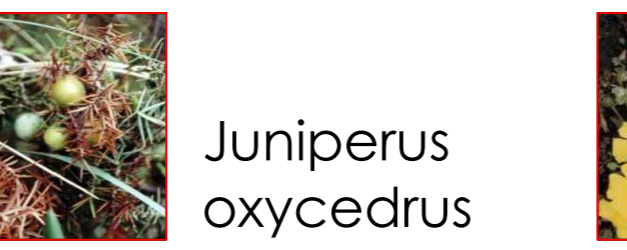

Echinophora spinosa

Silene colorata

sistema 2 "tras duna"
 Comunidad Helichryso - Crucianelletea Maritimae

Juniperus oxycedrus

Halimifolium

Quercus ilex

Cistus

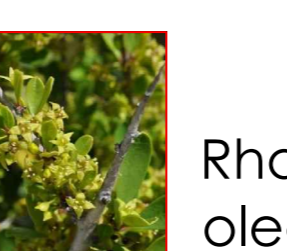

Saccharum-ravennae

Phillyrea latifolia

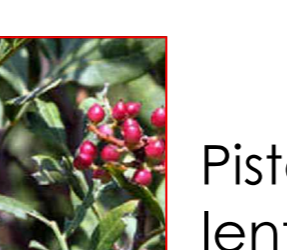

Rubia peregrina

Rhamnus oleoides

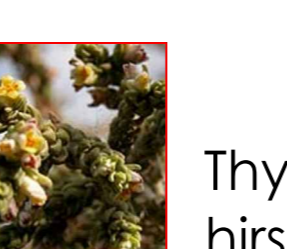

Myrtus communis

Pistacia lentiscus

Rosmarinus officinalis

Thymelaea hirsuta

Asparagus acutifolius

sistema 3 "depressione lagunale in seconda linea"
 Comunidad Pistacio lentisci-Rhamnetalia alaterni

Phragmites australis

Holoschoenus australis

sistema botanico vegetazione generale

Salsolo Cakiletum

Eriantho Schoenetum

Suaedo Salicornietum

Juniperion turbinatae

Ruppium

Cakile marittima

Puccinellio Arthrocnemum

Calystegia soldanella

Euphorbia paralias

Agropyron pungens

Echinophoro Ammophiletum

Otanthus maritimus

Juncetum

Sporobolo Agropyretum

Crucianellion

elenco materiali impiegati nella rigenerazione urbana

Doghe in polietilene

Manto stradale in terra battuta

Tappeto in drainbeton

Zanella

Manto stradale in bitume drenante
